CALL FOR PROJECTS

COLLECTIVE EXHIBITION

Nano-plasmatic artists, font-chemists, printer hackers, particle modelers, astrophysicist artists, My monkey offers to become the laboratory for your experimental researches and theories during a collective exhibition.

Open to all types of art (texts, still or moving images, graphic works, photographs, volumes, installations...), the project focuses on collision, resonance and friction between science, art and design, between anticipation, dystopias, research and contemporary creation. The selected works will be exhibited at My Monkey gallery during the 2018-2019 program.

Application instructions

Send your project digital package before the end of the open call.

Total weight of your package should be under 10 Mo. Supported file formats are: zip, jpg, pdf et rtf (rich text format) only.
